DETAILED ACTION

Claim Rejections - 35 U.S.C. § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 8-11 and 15-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Eggers et al. (WO 96/02180). Eggers et al. disclose a circuit for controlling the output from an electrosurgical generator and its method of use, the circuit comprising:

means for receiving an output current generated by the electrosurgical generator (the electrosurgical instrument); and

a diode-resistor block (Figure 2) connected to said means for limiting the amount of output current for at least one half cycle of the output current, wherein the diode-resistor is connected in series to said means as illustrated in Figure 3, or in parallel as illustrated in Figure 5 and wherein the diode-resistor block includes a pair of diodes biased opposite from each other for splitting the output current into two paths (p. 8, line 6-p. 12, line 27).

Allowable Subject Matter

Claims 5-7, 12-14 and 19-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
